SEVERAL LOCAL STORMS, OCTOBER 1943

(Compiled by Mary O. Souder)

The table herewith contains such data as has been received concerning severe local storms that occurred during the month. A revised list of tornadoes will appear in the United States Meteorological Yearbook]

Place	Date	Time	Width of path, yards	Loss of life	Value of property destroyed	Character of storm	Remarks					
Norfolk, Hampton Roads, and Cape Charles, Va., and vicinities.	Sept. 29-Oct. 1	P. m., Sept. 29	1 50	1	\$20,000.	Gales and heavy rains.	This storm of tropical origin reached these areas on the night of Sept. 29. High tides and heavy rains caused flooding of some streets in the downtown portion of Norfolk. A small ship and several small boats were sunk. Property damage was estimated at \$5.000; loss in crops about \$15.000.					
Michigan, eastern, upper and north-central lower penin- sulas.	Oct. 16- 19					Snow	More than 10 inches fell at several stations. Highway and rail traffic hampered and snow plows were required to clear roads on the 17th; however, all snow had melted by the 20th. Although snowfall in much of southern Lower Michigan and western Upper Michigan was of little consequence this was the third snowlest October of record.					
Altus, Okla	22				250, 000 5, 000	Hail do	Severe loss in cotton and feed crops over an area 30 by 7 miles in parts of Greer, Harmon, and Jackson Counties. Near the center of the area, cotton and feed were a total loss. Estimated loss in cotton alone, \$250,000. Much loss in cotton over a path 10 by 5 miles.					
Okla. Stillwater, Okla. Coasts of New York and New Jersey.	23 27	-			35, 000	do	Severe loss to 40 airplanes at the Municipal Airport. A 75-mile-an-hour wind, accompanied by torrential rains, battered the New York and New Jersey coasts, causing property damage which may run into millions of dollars. High seas, augmented by an incoming tide, raced over breakwaters and poured tons of water and sand over coastal highways the length of New Jersey and Long Island. Vehicular traffic was virtually halted and in some places railroad service was abandoned when roadbeds were washed out. Many cities and towns were without electric service and the Bell Telephone Company reported that 100 of its lines were down in Monmouth County, N. J. Sections of boardwalks in several New Jersey resort cities were swept away. In Wildwood, N. J., and vicinity, 5 public schools were closed,					
Hickman, Nebr., vicinity of	30	P. m	400	0	4,000	Tornado and hail	the pupils being marooned in their homes. Funnel-cloud observed. A considerable fall of hall occurred, but there was no damage, as crops had been previously gathered. Path 5 or 6 miles long.					
Lincoln, Nebr., vicinity of	30	do		0	4, 000	Tornado	Damage to farm buildings.					

¹ Miles instead of yards.

Data are airport records.
 Barometric data (adjusted to old city elevation) and hygrometric data from airport; otherwise city office records.
 Observations taken bihourly.

⁴ Pressure (adjusted to old city elevation), temperature, and hygrometric data from airport; otherwise city office records.

⁵ Temperature and precipitation from city office records, other data from airport.
